DETAILED ACTION

Claim 18 in the originally numbered claims in this application is missing. Therefore, the examiner has renumbered the claims from 1-28.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, 4, 7, 9, 13, 15, 16, 19, 21, 22 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by U.S. Patent No. 5,918,008 to Togawa et al.

As per claims 1 and 13, Togawa et al. disclose these features (see at least the abstract).

As per claims 2, 4, 7, 16 and 22, Togawa et al. disclose this limitation (col. 10, lines 44-49).

As per claims 9, 15 and 21, Togawa et al. show these features (see abstract).

As per claim 19, Togawa et al. display these limitations (see at least the abstract).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 8, 10-12, 14, 20, 26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Togawa et al. in view of the examiner taking official notice.

As per claims 8, 14 and 20, Togawa et al. do not specifically disclose these limitations. The examiner, however, takes official notice that these limitations are well known in the art. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have modified the system of Togawa et al. to include these features since they comprise well known elements in such a system.

As per claims 10-12, the scanning of a data structure is well known in the art involving anti-virus routines.

As per claims 26 and 28, Togawa et al. do not specifically show these features. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention

was made to have included these features in the system of Togawa et al. since it would make sense that a file would need some sort of identifier and a place to store it.

Allowable Subject Matter

Claims 3, 5, 6, 17, 18, 23, 24, 25, 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,359,659 to Rosenthal discloses Method for Securing Software Against Corruption by Computer Viruses.

U.S. Patent No. 5,440,723 to Arnold et al. discloses Automatic Immune System for Computers and Computer Networks.

U.S. Patent No. 5,964,889 to Nachenberg discloses Method to Analyze a Program for Presence of Computer Viruses by Examining the Opcode for Faults Before Emulating Instruction in Emulator.

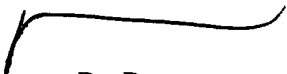

U.S. Patent No. 5,999,723 to Nachenberg discloses State-Based Cache for Antivirus Software.
